VideoCAD 6.0 is released!
[28 Nov 2007] [CCTVCAD Software, info@cctvcad.com]

VideoCAD is a multifunctional tool for professional video surveillance system design, modeling and measuring parameters of video images and video equipment

CCTVCAD Software

VideoCAD allows even the beginners to use the new opportunities appearing to be hard to obtain without it due to the complexity of calculations and therefore not being used even by the skilled engineers of CCTV.

● Click image for the **VideoCAD** website

VideoCAD practically boosts the quality of CCTV design to a new level which appears to be beyond any competition with those lacking the program.

VideoCAD 6.0 offers a lot of new features and advantages...
- Modeling illumination, luminaries, camera, lens and DVR parameters
- Supporting any image sensor formats, 16:9 and any other aspect ratio
- Supporting database of real camera models
- Import and export improvements
- Reports as interactive adjustable tables
- 3D model scaling, raster images in the 3D space...

And many other **NEW** tools and interface improvements (in total more than 70 new items). VideoCAD 6.0 has been tested with Windows Vista™.
